

Verified CONSENT

Automated Privacy Compliance Audits

What is it?

A forensic website crawler that audits a site for consent compliance.

Why use it?

Automate your compliance checks at scale (beyond single page audits).

Who should use it?

Privacy professionals working with data implementors.

Smart Features

- Audits a consent choice from any consent management platform (even custom banners).
- Assesses what cookies and tracker pixels load that should not.
- Customise crawl paths; Simulate visitors from within the EU, UK, or USA.
- Reports vendor 'sovereignty', not just data location.
- API access to embed results into your own reports/system.

Verified-Data.com

Launched in 2018. Running on Amazon EU.

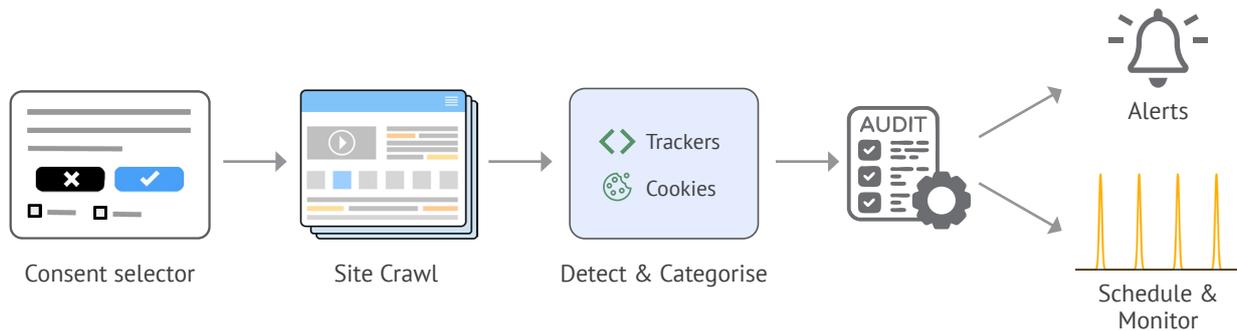

Verified CONSENT

Automated Privacy Compliance Audits

Audit Data Flow

In-depth data collection reports simulate real users, assess data collection, and if that matches their consent choice.

Tool Benefits

- Free up your valuable staff from tedious checks and compliance gotchas.
- Visualise complex website tracking setups to understand privacy implications.
- Built by privacy experts for privacy experts – the person behind Verified Data is [Brian Clifton](#).
- Highly scalable and cost effective - automate auditing 100s of web properties.

“If you are involved with privacy compliance, this is the absolute must-have tool to use.

- Fred P, Northwoods (USA)

“This is our secret weapon! It helps answer client questions other agencies cannot - and in record time.

- Tiffany S, MetricsEdge (USA)

“If you are building a sustainable website privacy program, you need this forensic tool.

- Sara, Search Integration (Sweden)
